SUMMARY

Experienced software engineer who has worked in every stage of product development and is looking for Product Manager roles. Excited about building and launching data-driven products

EXPERIENCE

Data Engineer

NBC News Digital Business Intelligence

📅 07/2019 - Ongoing 📍 Seattle, WA

- Led the development, implementation and planning of data pipelines to collect and analyze affiliate e-commerce data and save the company \$500K yearly in third party partnerships
- Worked with Product Owners to manage the development and release of a real-time dashboard that decreased video asset tracking lag from **10min** to **30 seconds**
- Created high throughput, reliable data pipelines to give stakeholders a swath of new user insights

Front-End Engineer

NBC News Digital Web (Rotation)

📅 01/2019 - 07/2019 📍 New York, NY

- Worked with an agile team of 12 members and QA to maintain and update sites with millions of daily visitors
- Contributed to the continuous development and daily release of nbcnews.com, today.com, and msnbc.com
- Initiated a discussion between the engineering and design team to build a better user experience using article skeletons and batch loading

Software Engineer

Comcast XD Prototype (Rotation)

📅 07/2018 - 01/2019 📍 Philadelphia, PA

- Ran and analyzed the data from monthly user tests over the Xfinity platform to increase user satisfaction by %4
- Built and prototyped the next generation of the Xfinity platform in **React**
- Built the Xfinity Home prototype to control smart devices around the house using voice

Full-Stack Engineer

Comcast Labs (Rotation)

📅 08/2017 - 07/2018 📍 Denver, Colorado

- Prototyped a smart home controlled through an **EEG** headset to allow patients with **ALS** a way to control their surroundings and regain independence
- Prototyped an Augmented Reality app using AR glasses to allow technicians to be hands free when on site and improve safety
- Used Apple's Turi Create to develop an Object Detection iOS app to allow technicians in head ends to scan and log machines and save Comcast \$10M a year
- Mentored and recruited start ups through the Boomtown incubator

PASSIONS

Creating accessible, intuitive products that empower the user

Building strong, local communities and creating environments that foster creativity and individual growth

SKILLS

Data Analysis Agile ETL

Batch/Streaming Data Processing

SQL Mentorship

UX User Research

EDUCATION

B.S Computer Science

The University of Texas at Austin

📅 06/2017

INVOLVEMENT

Class of 2019

Comcast CORE Technology

📅 07/2017 - 07/2019

Intensive two year rotational program focused on Software Engineering and Leadership across Comcast|NBCUniversal. Consists of one 1 year rotation followed by two 6 month rotations

Class of 2016 Fellow

Xtern

📅 05/2016 - 2016

Tech fellowship based in Indianapolis where fellows develop with local start-ups and learn how to impact their local communities
